OBJECTIVE

To leverage my one year of experience as a frontend developer to contribute effectively to a dynamic team, while continuously enhancing my skills in a collaborative and innovative environment.

EDUCATION

Bachelor of Computer Application, VNSGU   2021 - 2024
Relevant Coursework: Web Development (HTML, CSS, JavaScript, Java, React JS, Python)

Higher Secondary Education (12th), Guru Krupa Vidhya Sankul   2018 - 2020
Relevant Subjects: (State, Account, B.A., Economics)

Secondary Education (10th), D.A.V Hindi Vidyalaya   2017 - 2018

SKILLS

Technical Skills   HTML, CSS (Bootstrap, Tailwind CSS), JavaScript (React.js)
Soft Skills   Communication, Collaboration, Adaptability, Problem-solving
Other Skills   Leadership, Time Management, Emotional Intelligence, Creativity

EXPERIENCE

React.js Intern   2023 - 2024
The Diamond Port   *Surat, Gujarat*

- Contributed to developing dynamic and responsive web applications using React.js during my internship at The Diamond Port.
- Led the development of various React.js applications, utilizing technologies like Redux, Axios, Tailwind CSS, and Go REST API.
- I have developed a project management system and a diamond ring builder web application utilizing my skills in React.js, Tailwind CSS, and Firebase.

PROJECTS

College Management System (G-Campus) Developed a user-friendly system for managing student data and academic activities using MERN Stack (MongoDB, Express.js, React.js, Node.js). The system offers comprehensive functionalities for student management and academic administration. Visit the application Try it here.

Project Management System Welcome to the Project Management System! Developed using React and Firebase, this web application simplifies project management tasks. It offers features like task management, user authentication, real-time collaboration, and project analytics. Get started by visiting the live website Try it here.

Diamond and Gemstone Ring Builder Experience the Diamond and Gemstone Ring Builder, a specialized tool that lets you design custom rings with your preferred diamonds, gemstones, and settings. This innovative platform offers a personalized and unique ring shopping experience. Developed using React, Redux, Axios, Tailwind CSS, and Redux Toolkit. Visit here to start designing your dream ring.

EXTRA-CURRICULAR ACTIVITIES

- Lead coding workshops and hackathons to promote learning and collaboration.
- Contribute to open-source projects on GitHub, improving frontend development practices.
